

REN62S

TIMELESS LINES, ADVANCED ENGINEERING.

Renda Yachts unites a timeless design philosophy with strong engineering to deliver a seamless balance of aesthetics, performance, and everyday usability. While each model preserves a consistent design language, it expresses its own character distinctly through its proportions, functionality, and the engineering mindset evident in every detail. With every project, Renda develops a design identity that strengthens brand integrity, retains its value over time, and sets a benchmark on an international scale.

We are proud to present the REN62S—offering enhanced comfort and functionality, while delivering a performance-focused experience through its technological infrastructure and engineering approach.

RENDAYACHTS

REN62S

The new **REN62S** makes a bold statement at first glance, with its enclosed design immediately capturing the eye. The fully integrated hardtop not only floods the interior with natural light, making the space feel more open and inviting, but also creates a stunningly sleek profile that excites the senses from any angle.

REN62S is not just about its striking design; it also stands out with enhanced equipment and features. Upgraded screens and superior sound systems offer better control, richer information, and more immersive entertainment, granting the user experience that is more intuitive, more engaging, and unmistakably high-end quality.

REN62S

Exterior.

For the **REN62S** exterior layout, we revisited the concept with functionality at its core and expanded the idea of “usable space” on deck. The foredeck—one of the model’s signature living areas—has been designed to deliver a more spacious sunbathing zone, a more comfortable lounge arrangement, and lighter ergonomics for entertaining guests.

As a result, **REN62S** offers a balanced exterior experience where aesthetics, performance, and comfort meet on the same line—through a deck plan that makes the most of generous areas and refined detailing across the hull.

Down the yacht's body, details reinforcing the **REN62S**'s sporty identity take the fore.

Sharp and flowing design lines not only accentuate the yacht's dynamic appeal but also convey its substantial scale from afar.

The carefully chosen carbon fiber accents contribute to an understated technical precision and high-end quality without excess, fostering a bold yet refined look.

RENESSA

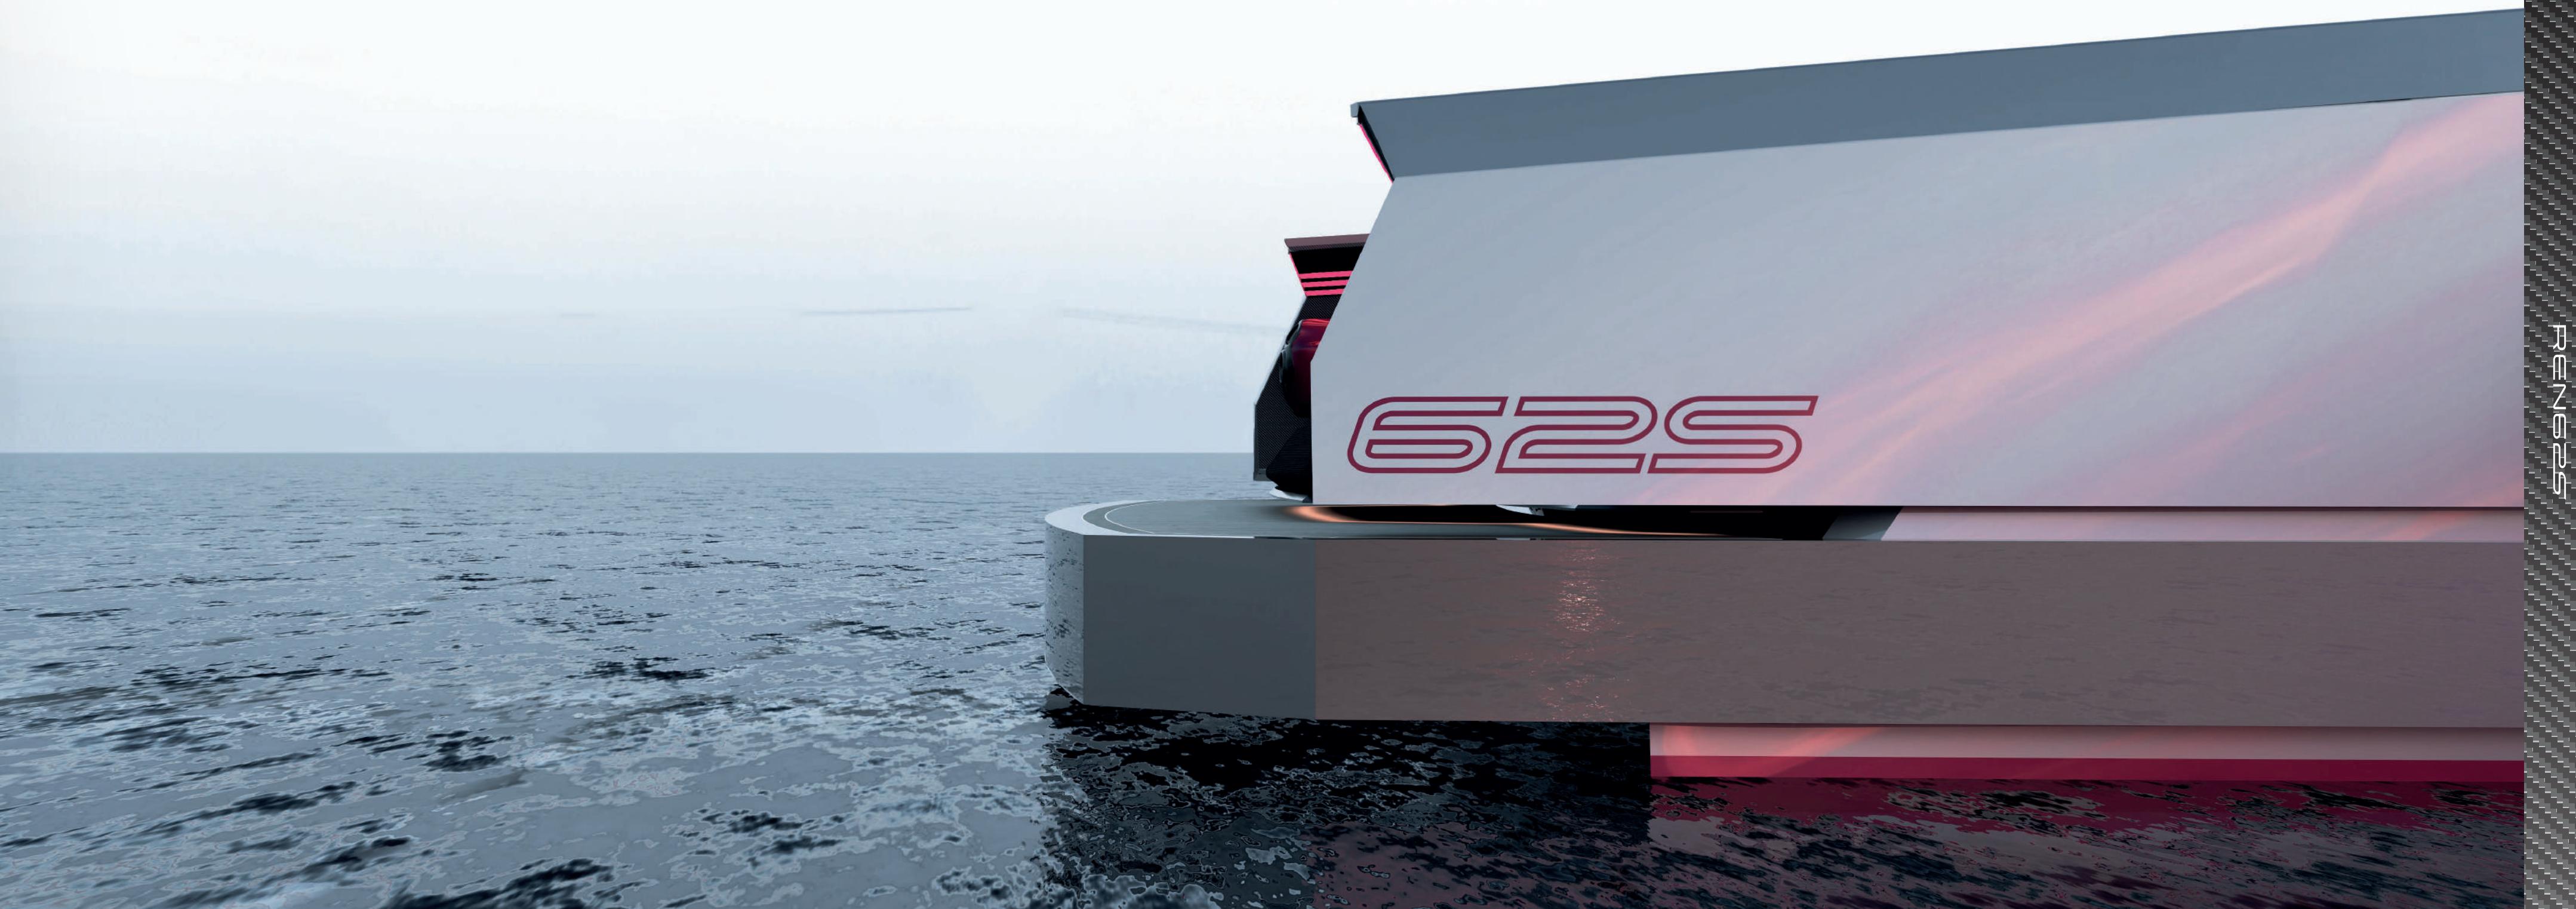

RENESSA

The sporty details highlighted in the new **REN62S**' aft section sharpen the yacht's dynamic character even further. The side lines and the hardtop are now conceived as a single, seamless whole—strengthening the flowing silhouette while enhancing wind and noise control for a calmer, more refined cruising experience.

REN62S preserves its striking stance while delivering a more serene, more exclusive, and more impressive experience at sea.

RENESSANS

RENESSANS

Alongside the fore and aft sunbathing areas, the added seating arrangement at the stern gives the deck a more functional and inviting layout. This new configuration delivers comfort that adapts to different needs throughout the day, makes entertaining easier, and allows freer movement on board.

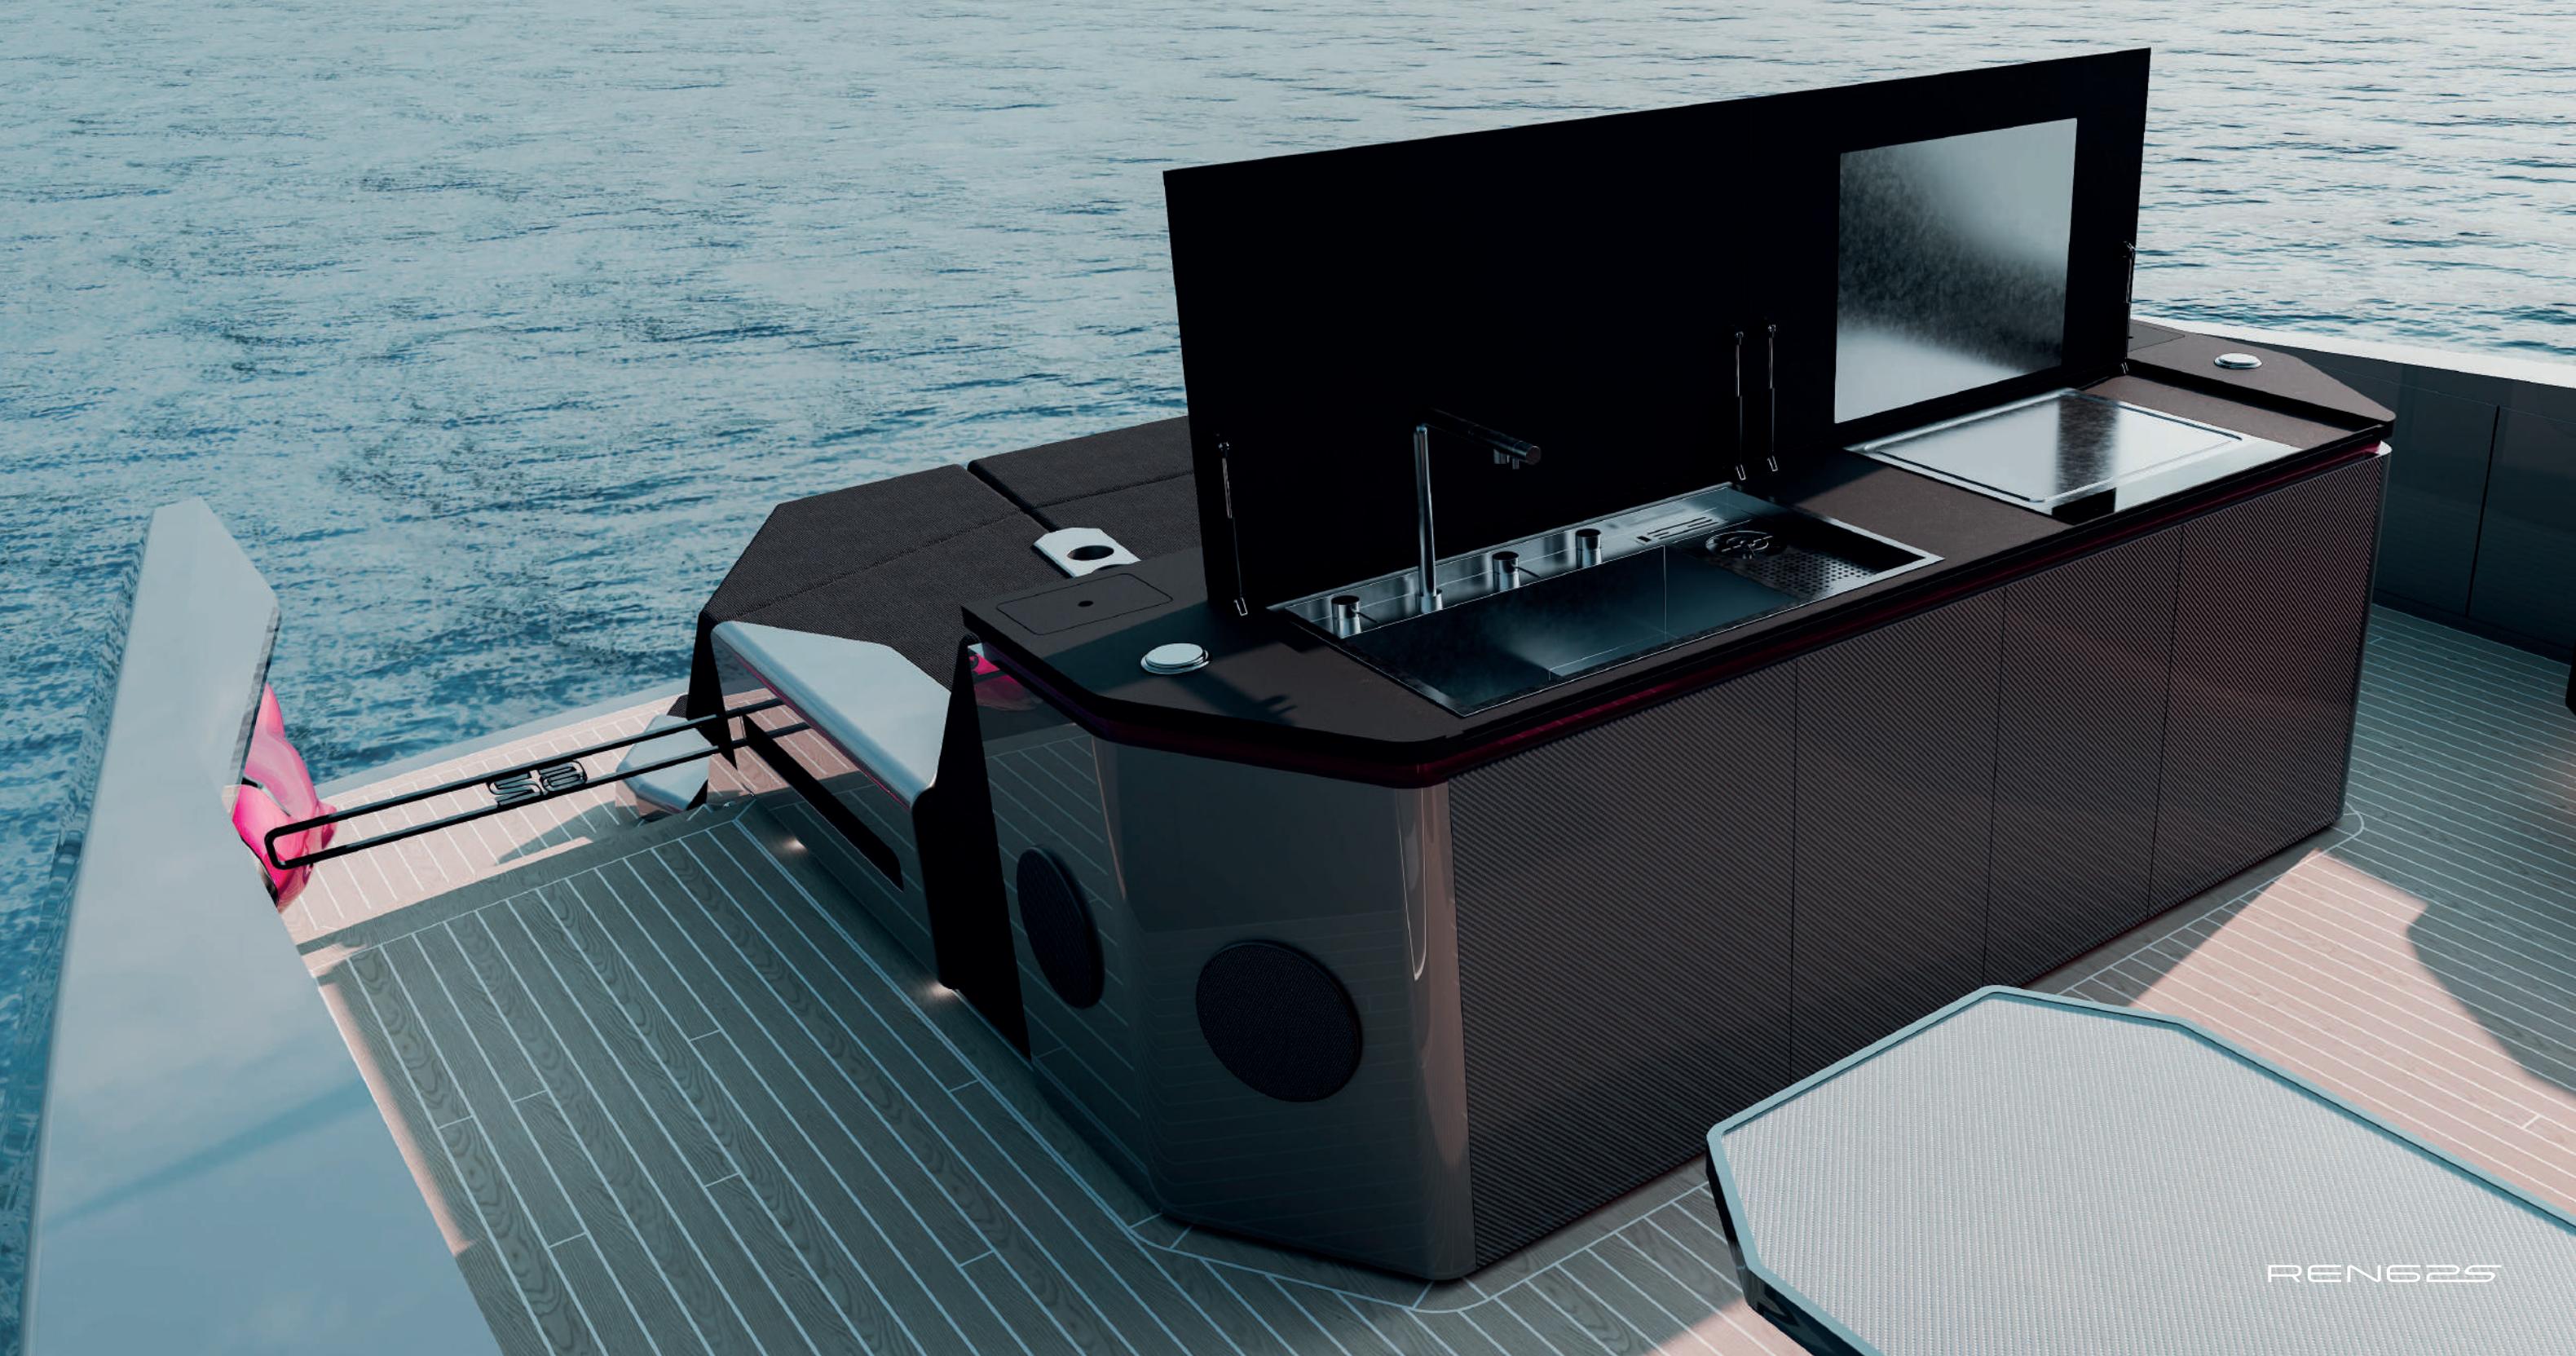

While implementing these enhancements, the yacht's sporty lines and strong stance were preserved with the same understated simplicity, in pursuit of a cohesive design language.

On the exterior, JL Audio and Void sound systems deliver impeccable acoustics, while Garmin navigation equipment ensures safety and a superior journey experience. The Transformer Pasarella offers both functionality and elegance, while the deck shower and underwater lights make every moment on the water truly unique.

Wet Bar

REN62S wet bar is designed to support social moments on deck with a clean, functional, and contemporary layout. Concealed cooking and washing areas are revealed only when needed, preserving a calm and uncluttered appearance. Integrated ice buckets and smart internal organization allow seamless drink preparation and service, while the overall composition keeps the bar intuitive, efficient, and visually balanced within the open deck.

The wet bar features a Dekton Sirius worktop paired with a handcrafted stainless-steel sink and an induction-teppanyaki cooking surface. Ice production is supported by a Hoshizaki ice maker with enhanced hygiene technology, complemented by a Vitrifrigi stainless steel drawer refrigerator for beverages. Storage compartments include an antibacterial sliding waste system, while JL Audio Marine subwoofers integrated above the bar deliver a powerful and immersive outdoor sound experience. A 65" Samsung TV, concealed within a motorized TV lift system, completes the area by adding an elegant entertainment layer when required.

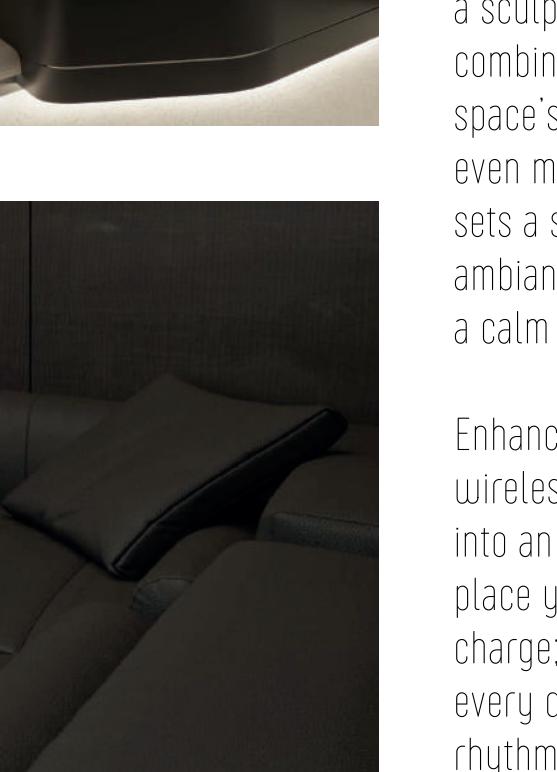

Interior.

The REN62S saloon is shaped by clean lines and carefully considered details, creating a welcoming setting for every moment on board.

A renewed glass-roof concept draws in daylight and amplifies the sense of space after sunset, it becomes a quiet frame for the stars above.

With a generous 240×165 cm seating lounge, relaxing or hosting guests feels effortless. Paired with a 55" Samsung TV, turning the saloon into a cinema experience is remarkably simple—so you can enjoy your favorite scenes with the same calm comfort as the sea.

Iconic Flos lighting completes the **REN62S**'s character, creating a sculptural accent in the saloon; combined with daylight, it reveals the space's depth and material quality even more clearly. In the evening, it sets a soft, balanced ambiance—bringing the living area into a calm yet striking atmosphere.

Enhancing everyday comfort, fast wireless charging turns technology into an effortless convenience. Simply place your phone down and let it charge; on the **REN62S**, every detail is designed for a seamless rhythm of life on board.

Galley

We redesigned the REN62S galley to make you feel the comfort of home—even at sea. The double-door Samsung refrigerator simplifies everyday use, keeping the kitchen accessible and organized without disrupting the flow of the layout.

Our new storage solutions offer a more structured, solution-oriented experience, ensuring every item has its place. The Miele electric cooktop and extractor hood support both performance and quiet comfort while cooking; the Miele wine cooler and oven complete the galley experience, delivering an orderly, fluid, and enjoyable use at any hour of the day.

REN62S

Master Cabin

The REN62S cabins are designed not only for rest, but to offer a calm, organized living space that adapts to each guest's habits. Personalized storage clarifies where everything belongs, keeping the cabin tidy and airy throughout the day.

Fast wireless charging completes comfort as an invisible detail in everyday use. It reduces the need for cables and lets you charge your devices effortlessly, always within reach.
